DETAILED ACTION

This Office Action is responsive to Applicant's remarks filed May 16, 2005. In further review of applicant's remarks and the claimed invention a restriction/election requirement is set forth below. Currently claims 1-92 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-43 and 80-89, drawn to selecting items for a project, classified in class 705, subclass 8.
- II. Claims 44-79 and 90-92, drawn to optimizing building material (item) costs (i.e. selecting lowest set cost), classified in class 705, subclass 7.

The Inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as selecting resources (e.g. personnel) for a project that meet one or more criteria (e.g. skill set) wherein the project, resources and criteria maybe any project, resource or criteria (e.g. selecting personnel to complete a software project in a predetermined period of time) and the selection need not be an optimal selection. In contrast invention

Art Unit: 3623

II has a separate utility of optimizing building material costs when constructing a structure. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Groups I or II is not required for Groups I or II restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Joe Gess on July 18, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3623
